

# CAPE TOWN, SOUTH AFRICA

**Together, we make up the  
very fabric of our city.**

The Cape Town city centre is an amphitheatre shaped area bordered by Table Mountain. It is often referred to as the “City Bowl” and is the very core of the Mother city. This lively region is where the ultimate amalgamation of creativity, diversity and economic activity comes alive. It houses Cape Town’s financial hub, one of Africa’s busiest harbours and is home to some of the city’s most historic neighbourhoods.
